EARLY IDENTIFICATION SYSTEM

SYSTEM FOR EARLY IDENTIFICATION OF CRITICAL VALUES OF ADULTS

Symptoms

- Systolic BP < 100 or > 170 mmHg
- Diastolic BP < 50 or > 100 mmHg
- Heart rate > 100/min or < 50/min
- SaO₂ < 90% when breathing air
- Sudden change of consciousness (qualitative, quantitative), speech disorder or flaccidity
- Disseminated intravascular coagulation (DIC)
- laboratory via
- bleeding into vital organs

Reaction:

1 symptom → CALL THE ATTENDING PHYSICIAN
2 symptoms → CALL ATTENDING DOCTOR AND RESUSCITATION (3333)

KAR doctor council

A) Leave in place, prescription of treatment measures, setting a time limit for inspection
B) Transition to RES

Inspection by a KAR doctor within the specified time limit:

A) The effect of treatment measures is **adequate** → leave in place
B) The effect of treatment measures is **inadequate** → transition to RES

Heart rate assessment

Adult

bradycardia < 50/min
tachycardia > 100/min

Always call the attending physician:
• if the heart rate is outside the specified limits and if CL does not specify otherwise

Blood pressure rating [mmHg]

Adult

hypotension < 100 mmHg in systole or < 50 mmHg in diastole
hypertension > 170 mmHg in systole or > 100 mmHg in diastole

Always call the attending physician:
• if the BP value is outside the specified limits and if CL does not specify otherwise

DIURESIS

Always call the attending physician:
• newly formed hematuria
• decrease in diuresis below 0.5 ml/kg/hour in the last 3 hours, downregulates benign CL

bleeding into the marrow

Always call the attending physician:
• sudden bleeding - defines the field of surgery
• continued bleeding - defines the operative field

Range of physiological heart rate values

	Adult	Child 1-12 years	Child 1-3 years	New born
bradycardia	< 60 breaths/min	< 10 breaths/min	< 12 breaths/min	< 20 breaths/min
tachycardia	> 25 breaths/min	> 25 breaths/min	> 30 breaths/min	> 60 breaths/min

Physiological values of blood pressure

	Adult	Child 1-12 years	Child 1-3 years	New born
bradycardia	< 20 mmHg	< 20 mmHg	< 20 mmHg	< 20 mmHg
tachycardia	> 40 mmHg	> 40 mmHg	> 40 mmHg	> 40 mmHg

LABORATORY

Always call the attending physician:
• if the value of the examination result is outside the specified limits and if you depart CL otherwise

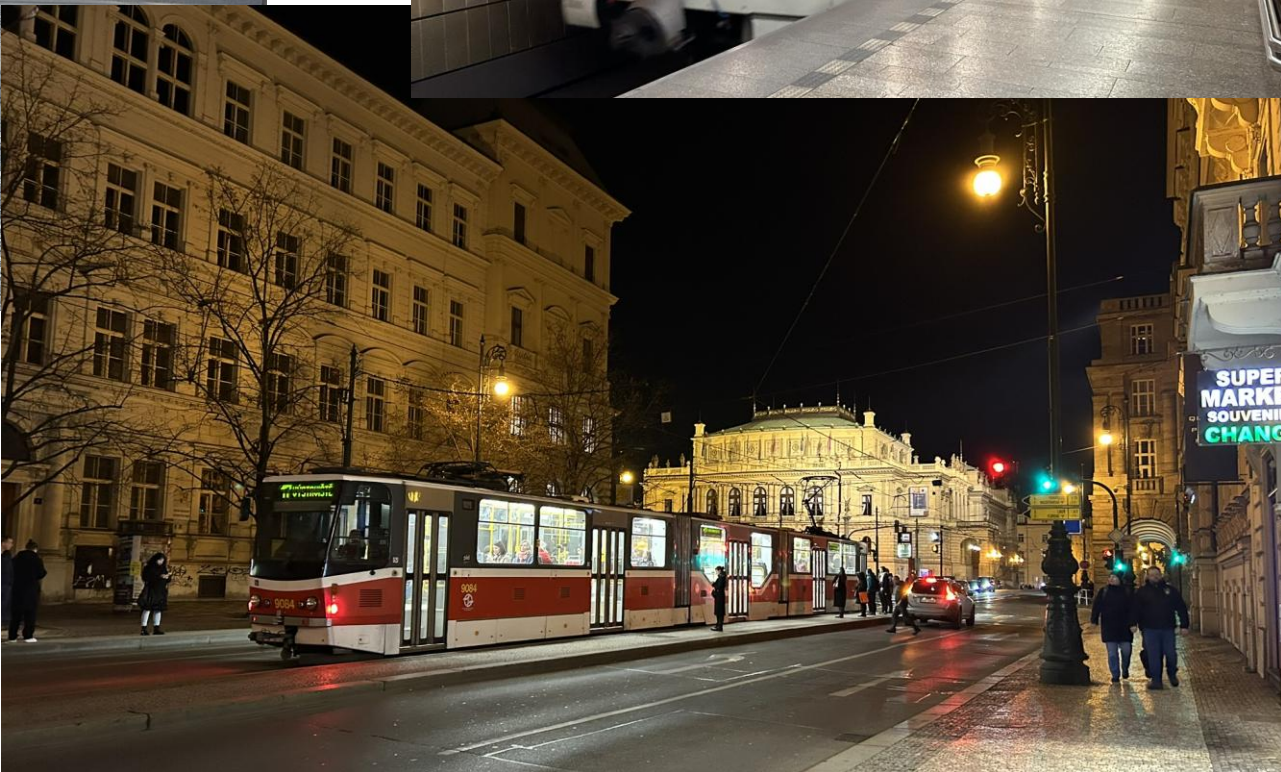

K⁺ > 6.5 mmol/l
BUN > 5
Creatinine < 4 mmol/l

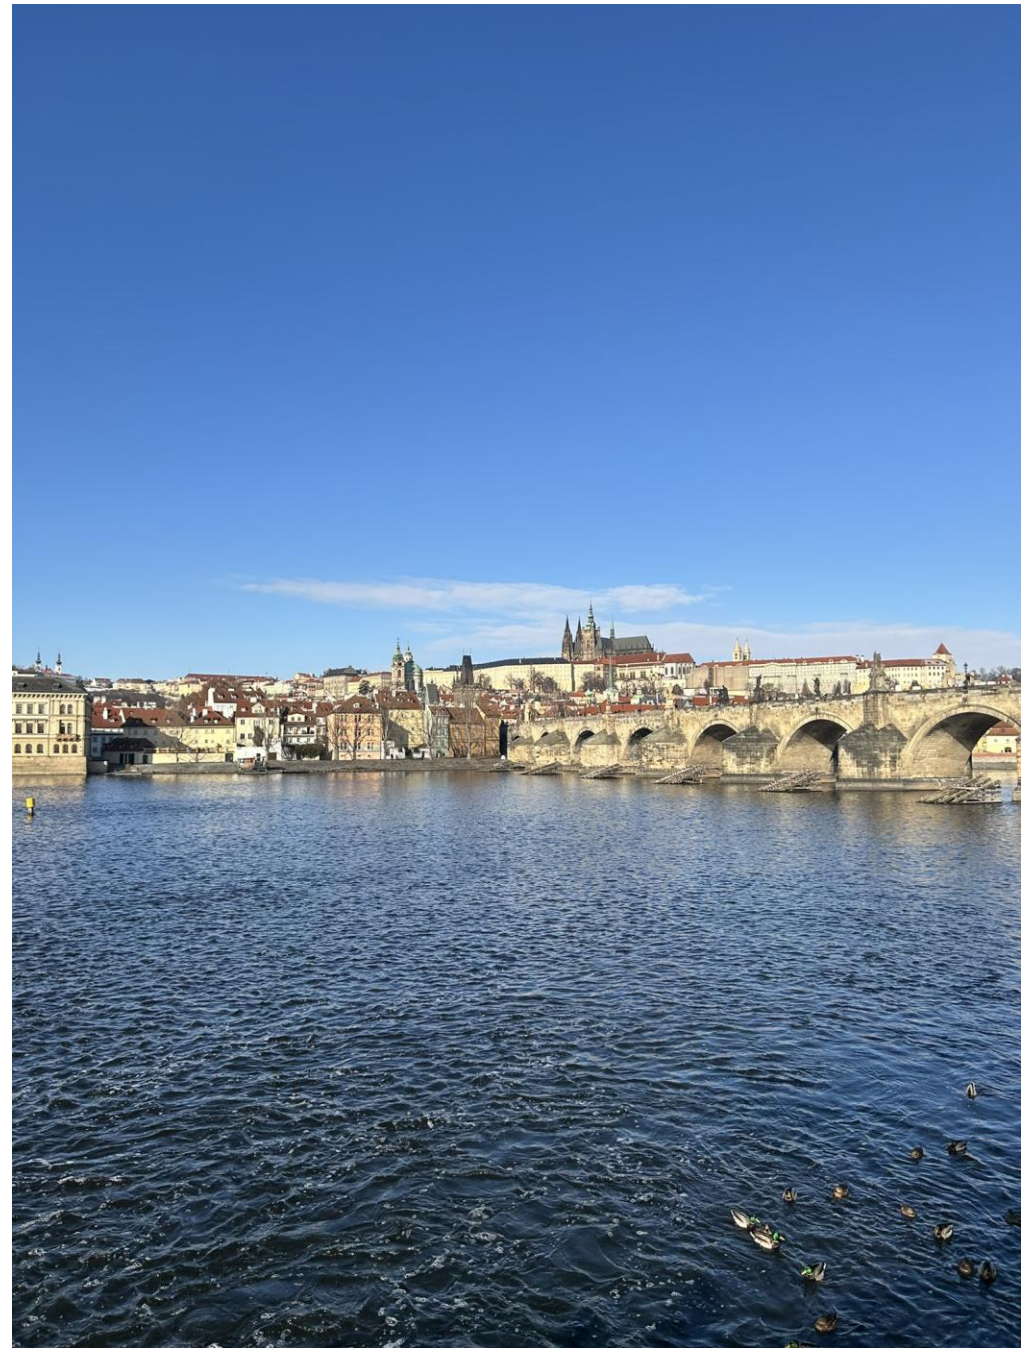

ワクチン・渡航外来

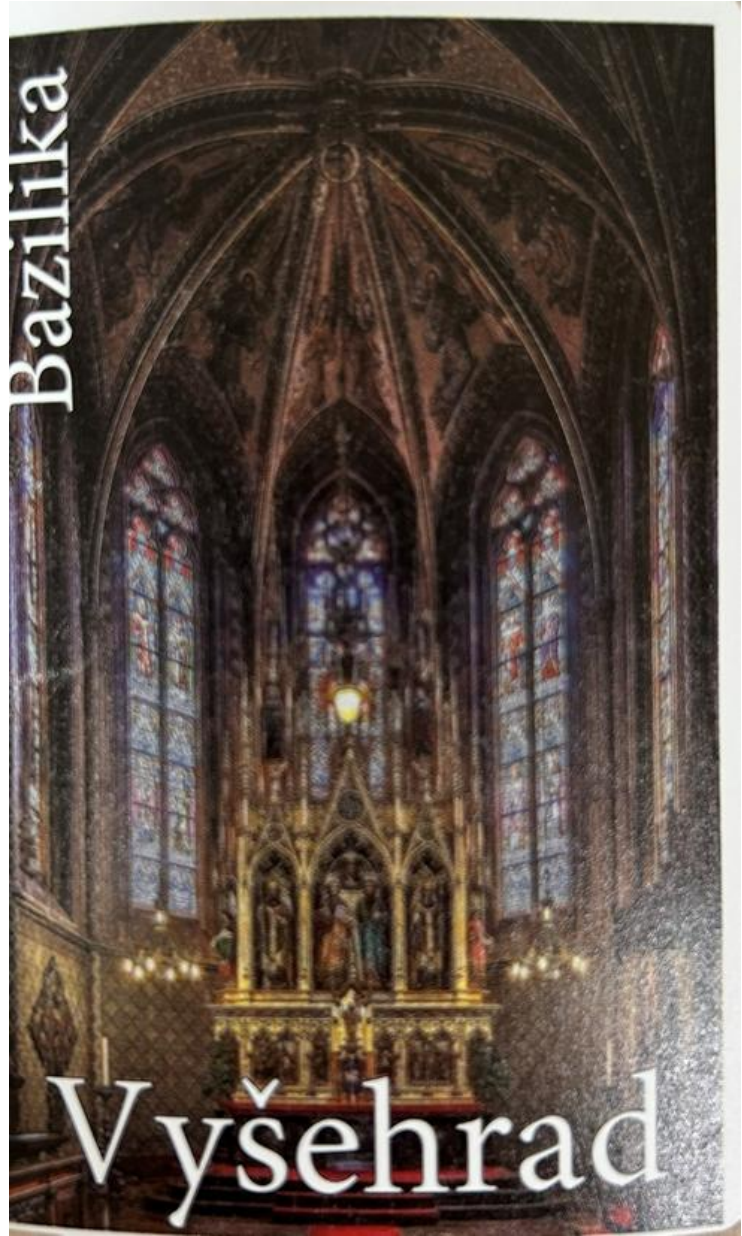

1.

**Sirloin with cream sauce
beef hind
bread dumpling**

2A.

**Moravian pork sparrow
